

# Implementation Manual

# Implementation Manual

This implementation manual contains the steps to install the following software:

1. JDK 7
2. NetBeans IDE 7.2
3. SQL Server 2012 Enterprise Edition

The following table lists the support software that you need to perform the lab exercises.

<i>S. No.</i>	<i>Software/Jar file</i>	<i>Source (Location from where the software will be available)</i>	<i>Target (Location on the host machine where software needs to be saved)</i>
1.	JDK 7 (jdk-7u17-windows-x64)	<a href="http://www.oracle.com/technetwork/java/javase/downloads/index.html">http://www.oracle.com/technetwork/java/javase/downloads/index.html</a>	D:\PIJ\Software
2.	NetBeans IDE 7.2	<a href="http://netbeans.org/downloads/7.2/">http://netbeans.org/downloads/7.2/</a>	D:\PIJ\Software

*The List of Support Software*

## Prerequisites

You need to perform the following tasks on each student node before beginning the lab exercises:

1. Create a folder with the name, **PIJ** in the **D:**\ drive.
2. Create a sub folder with the name, **Software** in the **D:\PIJ** folder.

## Installing JDK 7

To install JDK 7, you need to perform the following steps:

1. Browse to the location, **D:\PIJ\Software**.
2. Double-click the JDK 7 software, such as, **jdk-7u17-windows-x64.exe** file. The **User Account Control** dialog box will be displayed.
3. Click the **Yes** button. After a few moments, the **Java SE Development Kit 7 Update 17 (64-bit) – Setup** page of the Setup wizard is displayed.

### Note

*In case your login does not have administrative rights, you need to provide administrative credentials in the **User Account Control** dialog box, and then click the **Yes** button.*

4. Click the **Next** button. The **Java SE Development Kit 7 Update 17 (64-bit) - Custom Setup** page is displayed.
5. Click the **Next** button. The **Java SE Development Kit 7 Update 17 (64-bit) – Progress** page is displayed. After a few moments, the **Java Setup – Destination Folder** page is displayed.
6. Click the **Next** button. The **Java Setup – Progress** page is displayed for a few moments and then disappears. Thereafter, the **Java SE Development Kit 7 Update 17 (64 bit) – Complete** page is displayed.
7. Click the **Close** button. After a few moments, the **register – Notepad** window is displayed.
8. Close the **register – Notepad** window.

### Note

*In case, in step 7, a Web page is displayed instead of the notepad window, close the Web page.*

### Note

*The software gets updated frequently on the website. Therefore, the name of the software and the dialog box may vary.*

## Installing NetBeans IDE 7.2

To install NetBeans IDE 7.2, you need to perform the following steps:

1. Browse to the location, **D:\PIJ\Software**.
2. Double-click the **netbeans-7.2-ml-javase-windows.exe** file. The **User Account Control** dialog box is displayed.
3. Click the **Yes** button. After a few moments, the Welcome page of the **NetBeans IDE Installer** wizard is displayed.

### Note

*In case your login does not have administrative rights, you need to provide administrative credentials in the **User Account Control** dialog box, and then click the **Yes** button.*

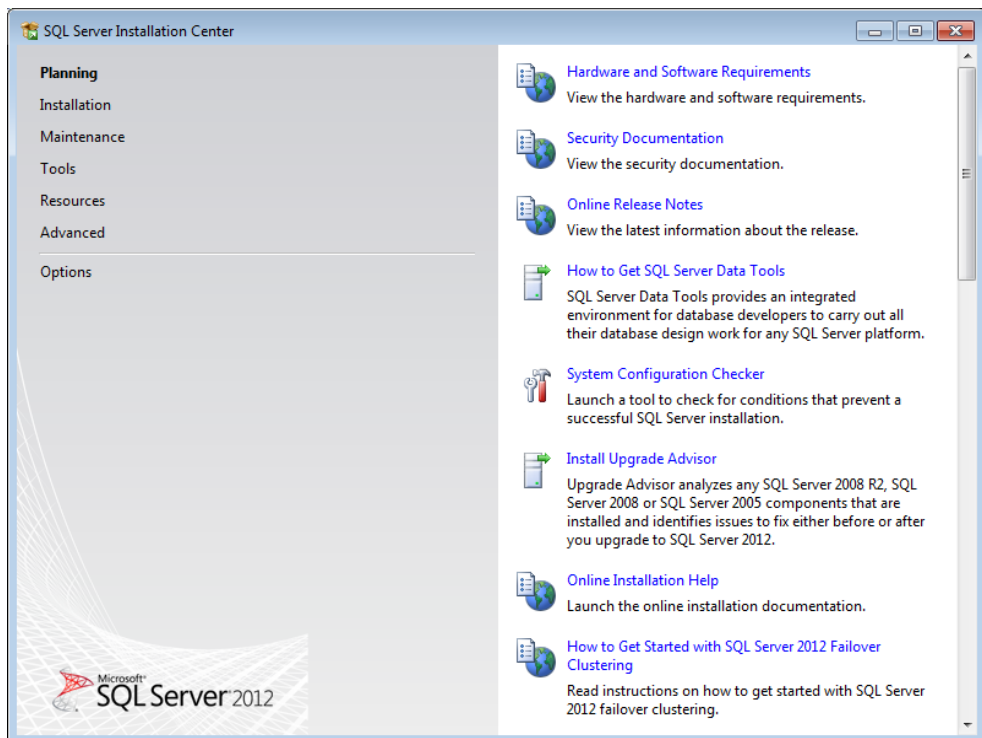

4. Click the **Next** button. The **License Agreement** page is displayed.

5. Select the **I accept the terms in the license agreement** check box.
6. Click the **Next** button. The **JUnit License Agreement** page is displayed.
7. Click the **Do not install JUnit** option.
8. Click the **Next** button. The **NetBeans IDE 7.2 Installation** page is displayed.
9. Click the **Next** button. The **Summary** page is displayed.
10. Click the **Install** button. The installation starts. Once the installation is completed, the **Setup Complete** page is displayed.
11. Click the **Finish** button.

## Installing SQL Server 2012 Enterprise Edition

To install SQL Server 2012 Enterprise edition, you need to perform the following steps:

1. Insert the SQL Server 2012 DVD into the DVD drive.
2. Browse to the DVD drive
3. Double-click the **Setup.exe** file. After a few moments, the **SQL Server Installation Center** window appears, as shown in the following figure.

*The SQL Server Installation Center Window*

**Note**

If the **User Account Control** dialog box is displayed, click the **Yes** button.

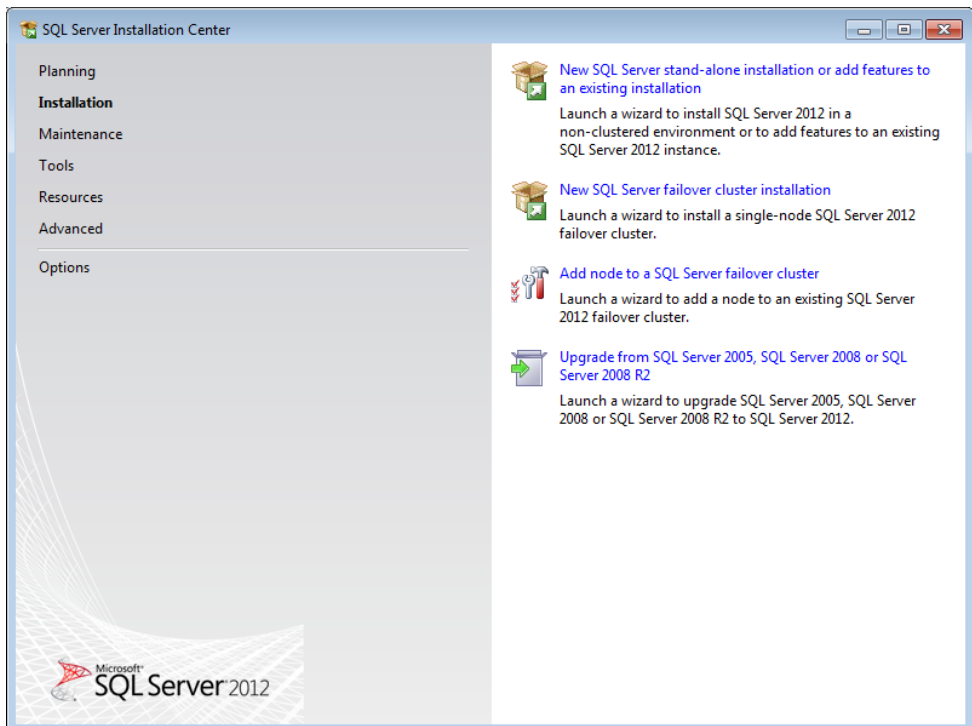

**Note**

The **SQL Server 2012** message box may be displayed for a while during the installation process, as shown in the following figure.

*The SQL Server 2012 Message Box*

- Click the **Installation** link in the left pane. The various links are displayed in the right pane of the **SQL Server Installation Center** window, as shown in the following figure.

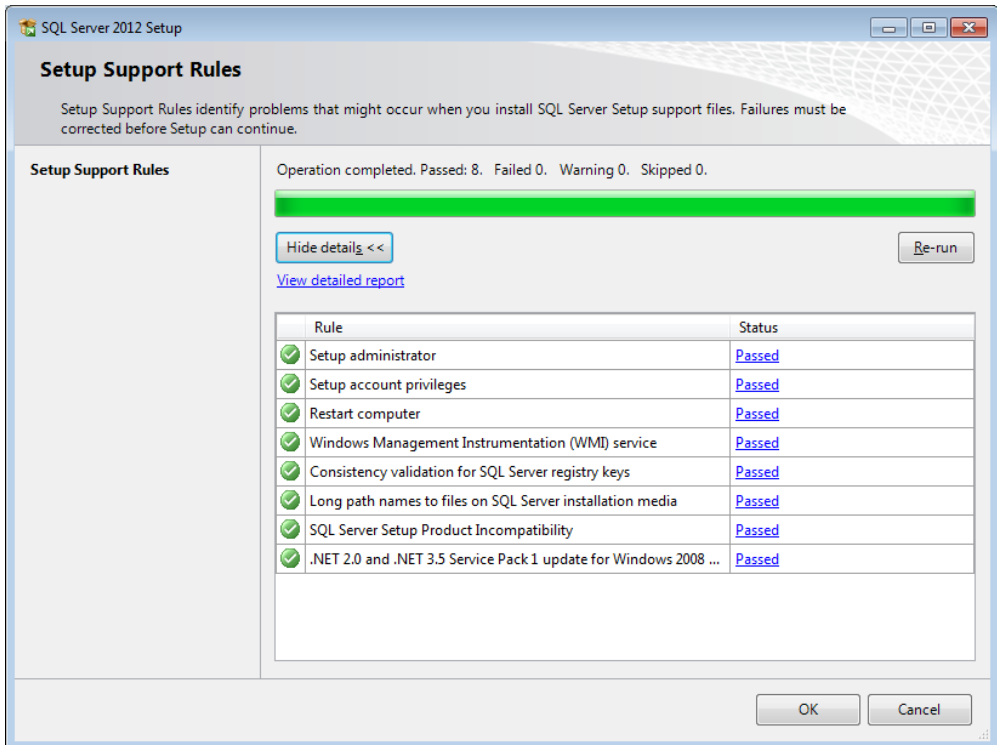

*The SQL Server Installation Center Window*

5. Click the **New SQL Server stand-alone installation or add features to an existing installation** link in the right pane. The **SQL Server 2012 Setup** window is displayed after a while, as shown in the following figure.

*The SQL Server 2012 Setup Window*

6. Click the **Show details** button. The details of the SQL Server setup support files are displayed in the **Setup Support Rules** page, as shown in the following figure.

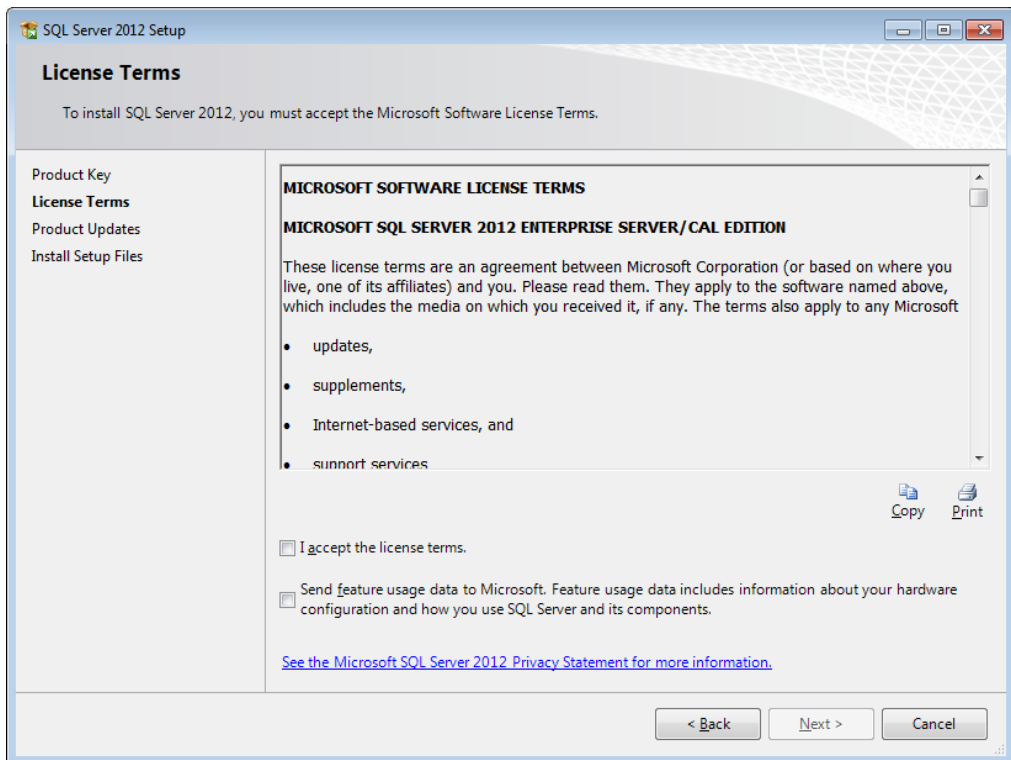

*The Setup Support Rules Page*

7. Click the **OK** button. After a few moments, the **Product Key** page is displayed.
8. Ensure that the **Enter the product key** option is selected and the product key is displayed in the text box provided under the **Enter the product key** option.

9. Click the **Next** button. The **License Terms** page is displayed, as shown in the following figure.

*The License Terms Page*

10. Select the **I accept the license terms** check box.

11. Click the **Next** button. The **Install Setup Files** page is displayed for a few moments, and then the **Setup Support Rules** page is displayed, as shown in the following figure.

*The Setup Support Rules Page*

### Note

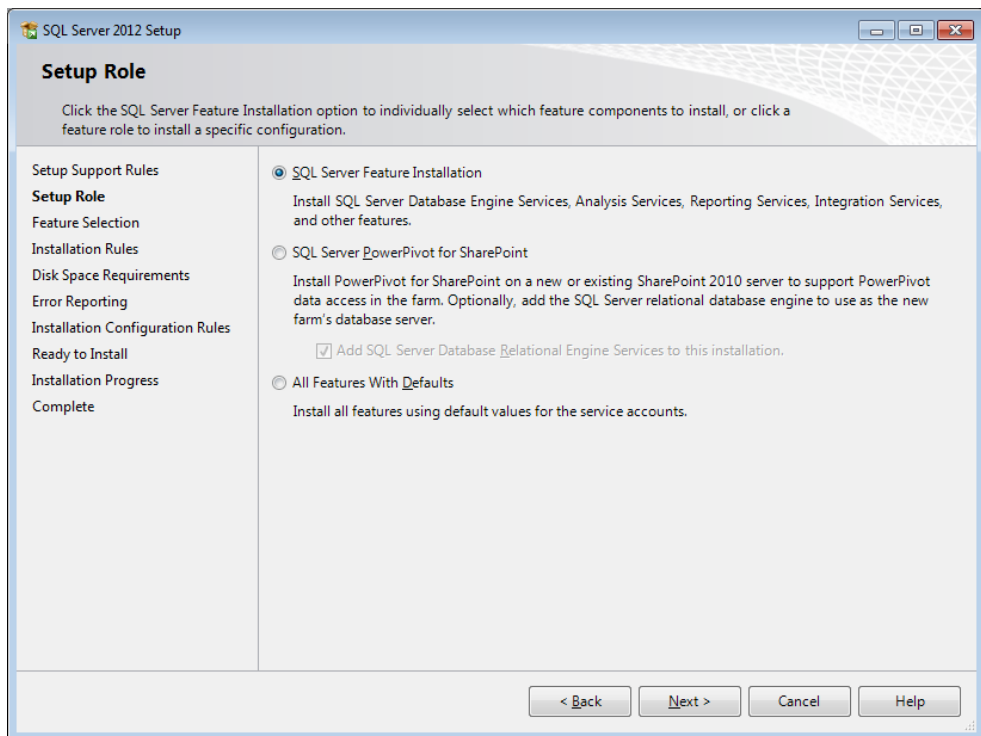

While installing, the *SQL Server Setup* searches for updates through the Windows Update service. If it fails to search for the updates, the **Product Updates** page is displayed, as shown in the following figure.

### The Product Updates Page

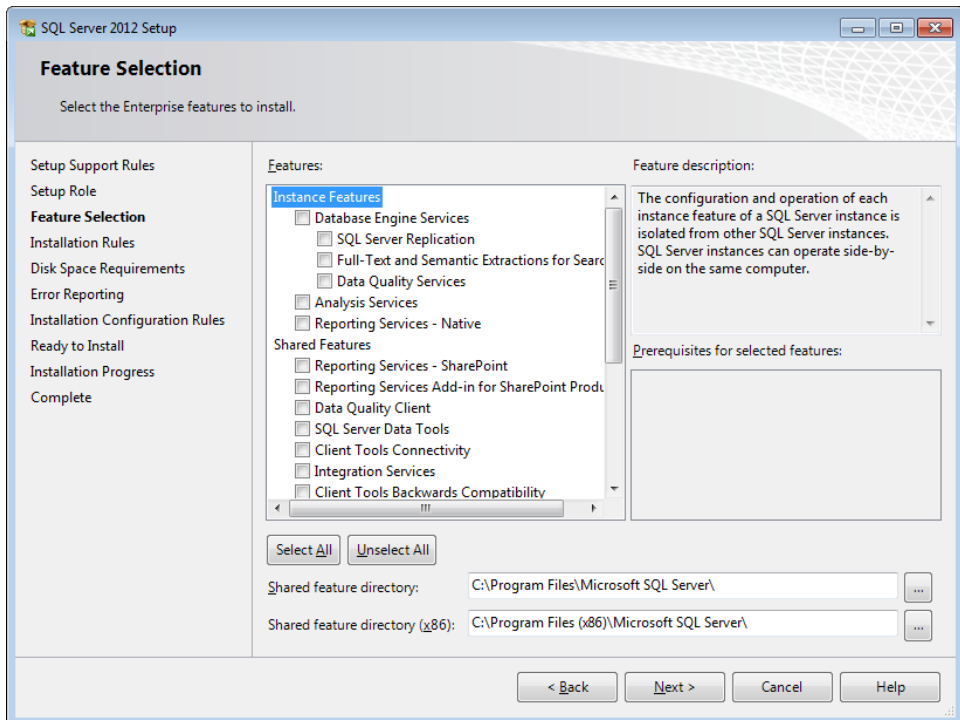

Click the **Next** button to continue.

12. Click the **Next** button. The **Setup Role** page is displayed, as shown in the following figure.

*The Setup Role Page*

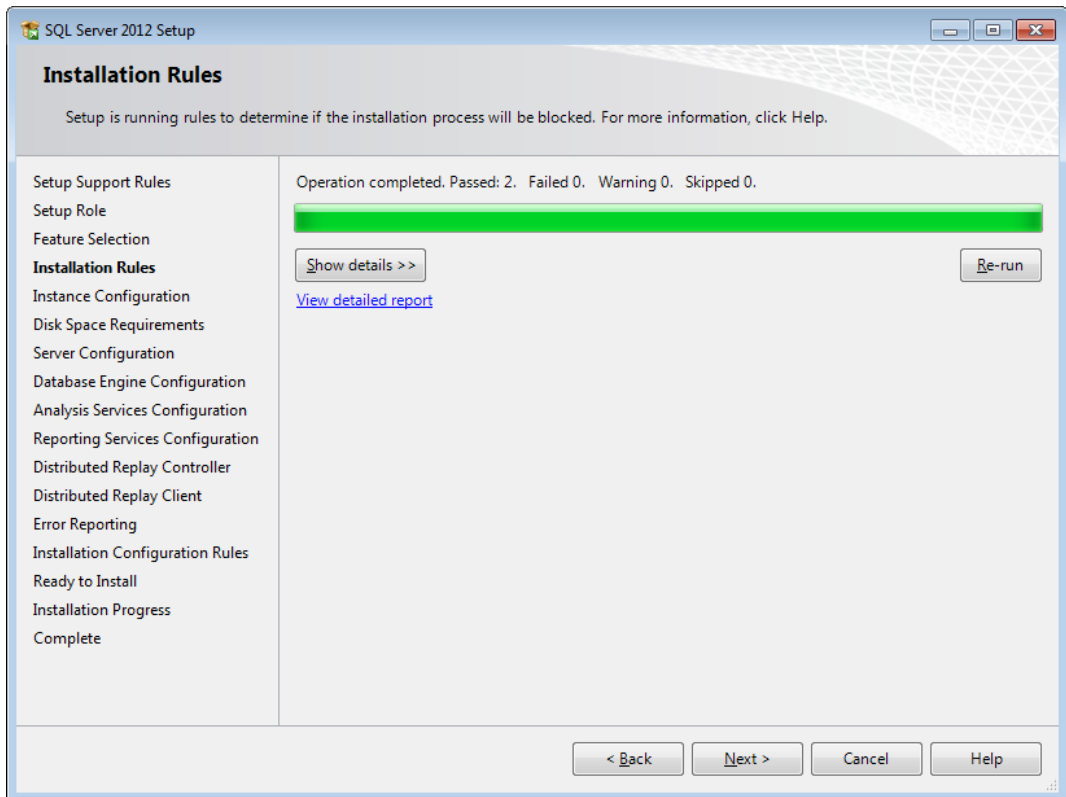

13. Click the **Next** button. The **Feature Selection** page is displayed, as shown in the following figure.

*The Feature Selection Page*

14. Click the **Select All** button in the right pane.

15. Click the **Next** button. The **Installation Rules** page is displayed, as shown in the following figure.

*The Installation Rules Page*

16. Click the **Next** button. The **Instance Configuration** page is displayed, as shown in the following figure.

SQL Server 2012 Setup

### Instance Configuration

Specify the name and instance ID for the instance of SQL Server. Instance ID becomes part of the installation path.

*The Instance Configuration Page*

17. Ensure that the **Default instance** option is selected.
18. Click the **Next** button. After a few moments, the **Disk Space Requirements** page is displayed.

19. Click the **Next** button. The **Server Configuration** page is displayed, as shown in the following figure.

*The Server Configuration Page*

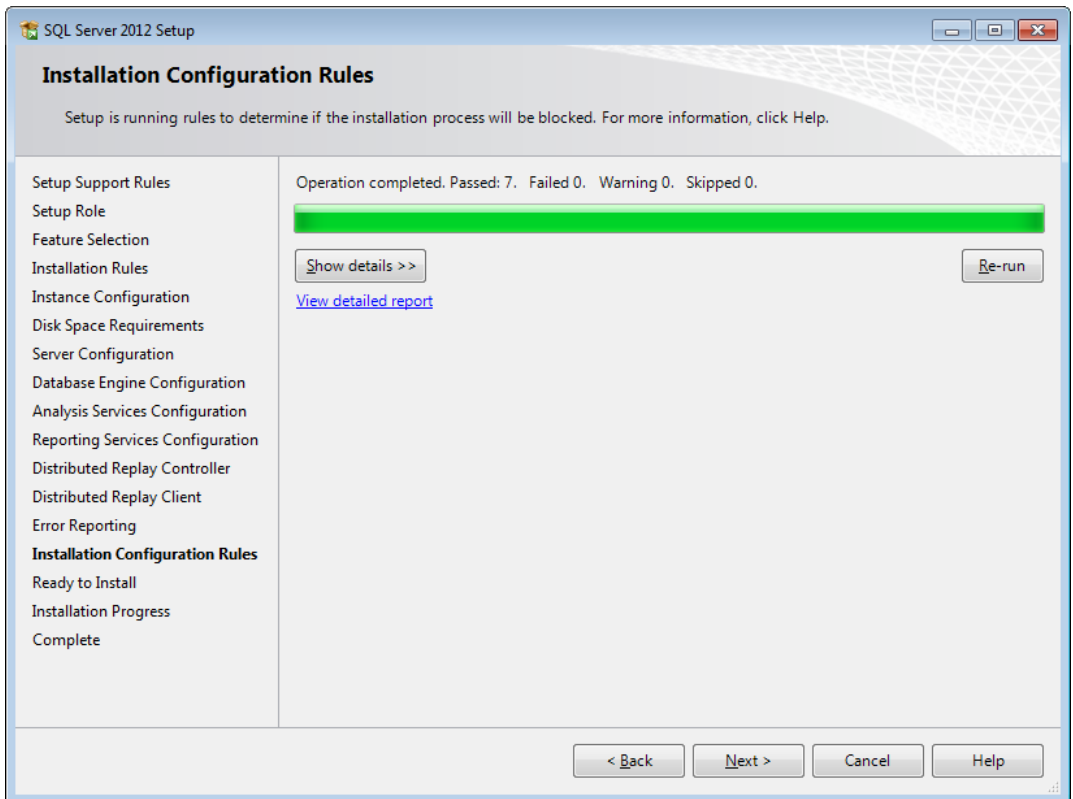

20. Click the **Next** button. The **Database Engine Configuration** page is displayed, as shown in the following figure.

*The Database Engine Configuration Page*

21. Select the **Mixed Mode (SQL Server authentication and Windows authentication)** option in the right pane.
22. Enter the password for the **sa** user account in the **Enter password** text box.
23. Enter the same password in the **Confirm password** text box.
24. Click the **Add Current User** button. The name of the current user is displayed in the **Specify SQL Server administrators** text area.
25. Select the **FILESTREAM** tab.
26. Select the **Enable FILESTREAM for Transact-SQL access** check box to enable FILESTREAM on this instance of SQL Server.
27. Select the **Enable FILESTREAM for file I/O access** check box.
28. Select the **Allow remote clients access to FILESTREAM data** check box.
29. Click the **Next** button. The **Analysis Services Configuration** page is displayed.
30. Click the **Add Current User** button in the right pane. The name of the current user is displayed in the **Specify which users have administrative permissions for Analysis Services** text area.

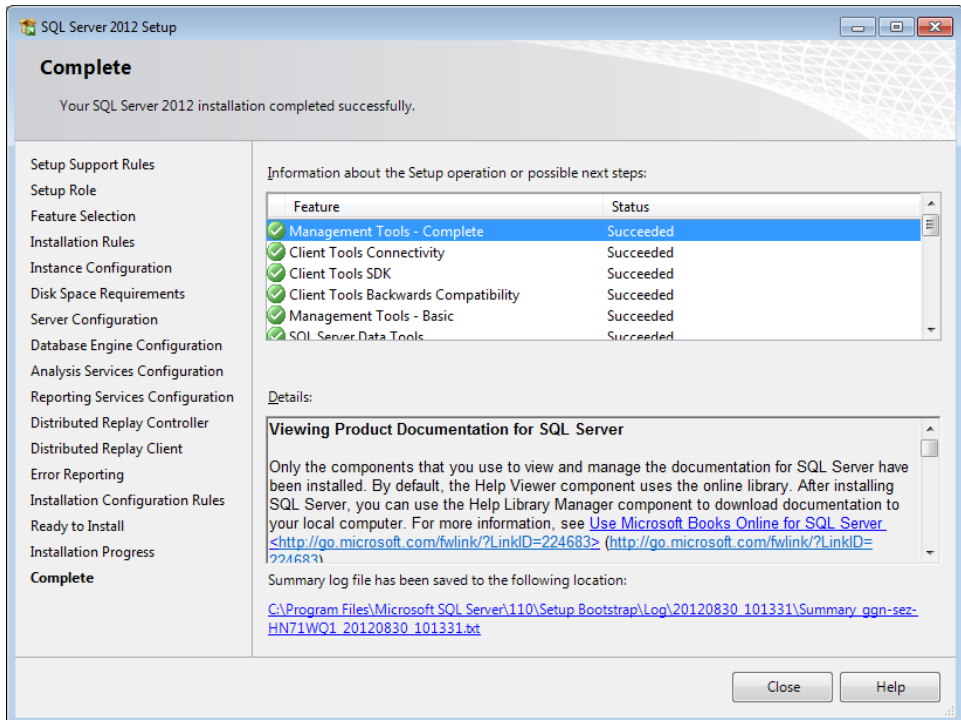

31. Click the **Next** button. The **Reporting Services Configuration** page is displayed.
32. Click the **Next** button. The **Distributed Replay Controller** page is displayed.
33. Click the **Add Current User** button in the right pane. The name of the current user is displayed in the **Specify which users have permissions for the Distributed Replay Controller service** text area.
34. Click the **Next** button. The **Distributed Replay Client** page is displayed.
35. Click the **Next** button. The **Error Reporting** page is displayed.
36. Click the **Next** button. The **Installation Configuration Rules** page is displayed, as shown in the following figure.

*The Installation Configuration Rules Page*

37. Click the **Next** button. The **Ready to Install** page is displayed.

38. Click the **Install** button. The **Installation Progress** page is displayed for 20-25 minutes, and then the **Complete** page is displayed, as shown in the following figure.

*The Complete Page*

**Note**

Along with the **Complete** page, the **Computer restart required** dialog box may also be displayed, as shown in the following figure.

*The Computer restart required Dialog Box*

Click the **OK** button.

39. Click the **Close** button. The **SQL Server Installation Center** window is displayed.
40. Close the **SQL Server Installation Center** window.
